## ABOUT ME:

---

I am a motivated individual and a Level 3 BTEC Advanced Computing student at Bedford College with proficiency in computer and Math's with an excellent academic record and passion to progress within the IT industry.

Having an excellent grade at my GCSEs Math's, English, and Computing, I am keen to pursue a career in the Software development industry and any related industry. I have a proven aptitude for Mathematics and Computing which would make me an excellent asset to any IT department. Also, my volunteer work has provided me with a good range of workplace skills like relationship building, communication, and teamwork.

## SKILLS:

---

- |                |                  |                     |            |
|----------------|------------------|---------------------|------------|
| • SCSS         | • Git and GitHub | • JavaScript        | • React.js |
| • Tailwind CSS | • Accessibility  | • Responsive Design | • CSS3     |

## PROJECTS

---

### Easy Learn Website || [REACT.JS & CSS3](#)

- An educational website designed for course registration with other features below
- **Key Features below**
- Displays a list of available courses only after registration
- The user can select the courses they wish to enroll in.
- A secure payment gateway using Stripe
- **In Progress** - (Admin dashboard that provides an overview of the total numbers of registered students and their details)
- <https://easy-learn-edx-website.vercel.app/>

## Random Password Generator || [REACT.JS & TAILWINDCSS](#)

- Built a user- friendly, interactive, and responsive tool that generates random password combinations when clicked.
- Allow the users to customise the length of the password.
- Allow the users to customise the complexity of the password by including options for numbers and special characters.
- <https://password-generator-react-js-dun.vercel.app/>

## Cinemind Movie Watchlist || [REACT.JS & TAILWIND](#) **(IN PROGRESS)**

- Developed a dynamic movie application that allows users to search for movies and manage a personal watchlist.
- **Key features include:**
- Displays the trending movie from The Movie Database (TMDB) when loaded
- Fetching the movie data from TMDB API based on the user input.
- Add movies to their watchlist and remove them as desired.
- <https://cinemind-movie.vercel.app/>

## Personal Portfolio (Front End) || [REACT.JS & TAILWIND CSS](#)

- Created a personal portfolio to highlight my projects and skills. The portfolio includes a responsive design, interactive elements, smooth navigation, and a focus on user-friendly accessibility.
- <https://my-portfolio-alpha-nine-34.vercel.app/>
